

MediConnect.fit Phase-1 Clinical Intelligence Repository: Specification, Architecture & Implementation Guide v1.0

—	00_Specification
—	00_MediConnect_Fit_Phase1_Clinical_Knowledge_Repository_Specification_v1.0.pdf
—	00_MediConnect_Fit_Phase1_Repository_Implementation_Guide_v1.0.pdf
—	00_MediConnect.fit Phase-1 Clinical Intelligence Repository, Specification, Architecture & Implementation Guide v1.0

1. Complaint_Synonym_Master.xlsx
(Patient complaint normalization repository containing canonical complaints and synonyms)
 2. Complaint_Diagnosis_Map.xlsx
(Complaint-to-diagnosis mapping repository used for diagnosis suggestions and ranking)
 3. Diagnosis_Master.xlsx
(Master diagnosis repository containing all approved diagnosis codes and diagnosis definitions)
 4. Diagnosis_Specialty_Map.xlsx
(Diagnosis-to-specialty routing repository used to determine the appropriate medical specialty)
 5. Specialty_Routing_Master.xlsx
(Master mapping file that automatically routes each complaint, symptom, or diagnosis to the most appropriate medical specialty for consultation and case assignment.)
 6. Doctor_Assignment_Rules.xlsx
(Specialty-to-doctor assignment repository used for doctor allocation and consultation routing)
 7. Medicine_Master.xlsx
(Master medicine repository containing medicine identifiers, formulations, strengths, and metadata)
 8. Medicine_Diagnosis_Map.xlsx
(Diagnosis-to-medicine recommendation repository used for prescription assistance)
 9. Telemedicine_Eligibility_Rules.xlsx
(Telemedicine validation repository used to determine consultation eligibility and restrictions)
 10. Escalation_Rules.xlsx
(Patient safety repository used for red-flag detection, escalation decisions, and emergency routing)
 11. Lab_Test_Master.xlsx
(Master laboratory and diagnostic investigation repository)
 12. Diagnosis_Template_Repository.xlsx
(Prescription support repository containing advice templates, follow-up guidance, investigation recommendations, and consultation support content)
-

5. Doctor Assignment Rules for MEDICONNECT.FIT

PHASE-1- 'V1.0'

Doctor_Assignment_Rules

Purpose:

Complaint

→ Diagnosis

→ Specialty

→ Doctor Selection

This is what ultimately decides:

Which doctor receives the case?

inside MediConnect.fit.

Doctor_Assignment_Rules Schema

rule_id,

specialty_id,

consultation_mode,

patient_age_group,

gender_restriction,

case_priority,

telemedicine_allowed,

doctor_selection_logic,

active_status

Doctor_Assignment_Rules Part-1

DAR000001-DAR000100

General Medicine

Repository Design Rule

Do **not** create one rule per diagnosis.

Instead:

630 Diagnoses

↓

22 Specialties

↓

100-150 Assignment Rules

Developer Notes:

assignment_strategy enum:

ROUND_ROBIN

LEAST_ACTIVE_CASES

SENIORITY_PRIORITY

MANUAL_ASSIGNMENT

doctor_filter enum:

SPECIALTY_MATCH

SUBSPECIALTY_MATCH

LICENSE_MATCH

LOCATION_MATCH

priority_level enum:

LOW
MEDIUM
HIGH
CRITICAL

consultation_type enum:

TELE
VIDEO
CLINIC
HOME_VISIT

age_group enum:

CHILD
ADULT
SENIOR
ALL

This format is directly database-friendly and can be consumed by the MediConnect.fit assignment engine without additional interpretation logic.

6. Medicine_Master.xlsx

Patient Complaint

↓

Complaint Mapping

↓

Diagnosis Mapping

↓

Specialty Routing

↓

Doctor Assignment

↓

Prescription Layer

↓

Medicine Master

Without Medicine_Master, prescription analytics, refill logic, medicine search, and pharmacy integration remain weak.

Build a normalized launch repository.

Structure:

medicine_id
generic_name
strength
dosage_form
route
schedule
adult_flag
pediatric_flag
active_status

Telemedicine Eligibility Rules FOR MEDICONNECT.FIT **Repository Schema**

```
rule_id,  
diagnosis_id,  
diagnosis_name,  
telemedicine_allowed,  
video_required,  
physical_exam_required,  
emergency_referral_required,  
home_visit_recommended,  
hospital_referral_required,  
rule_reason,  
active_status
```

Developer Implementation Logic

IF telemedicine_allowed = TRUE

- allow instant booking
- allow video consultation
- allow eRx generation
- allow follow-up teleconsultation

IF telemedicine_allowed = FALSE

- block tele-only flow
- force clinic/home visit/hospital path
- show escalation banner
- log compliance reason

IF emergency_referral_required = TRUE

- bypass doctor queue
 - trigger Emergency Workflow
 - show Ambulance CTA
-

Telemedicine_Eligibility_Rules

Repository Status

Coverage:

- ✓ General Medicine
 - ✓ Cardiology
 - ✓ Diabetes
 - ✓ Thyroid
 - ✓ Neurology
 - ✓ Psychiatry
 - ✓ Dermatology
 - ✓ Urology
 - ✓ Gynecology
 - ✓ Ophthalmology
 - ✓ Preventive Medicine
 - ✓ Geriatrics
 - ✓ Chronic Disease Follow-up
-

Escalation Rules(Emergency & Red Flags Engine)

Escalation_Rules Schema

rule_id,
trigger_type,
trigger_value,
severity_level,
escalation_action,
ambulance_required,
hospital_required,
doctor_priority,
notification_required,
reason_code,
active_status

Escalation_Rules Part-1 CARDIOLOGY RED FLAGS

Developer Implementation Rules

IF severity_level = CRITICAL

THEN

bypass_doctor_queue = TRUE
show_emergency_banner = TRUE
priority_score = 100
create_escalation_ticket = TRUE
notify_operations_team = TRUE
IF ambulance_required = TRUE
show_ambulance_button = TRUE
IF hospital_required = TRUE
show_hospital_referral_options = TRUE

Phase-1 Emergency Engine Status

Coverage:

- ✓ Cardiac Emergencies
- ✓ Stroke Emergencies
- ✓ Seizure Emergencies
- ✓ Respiratory Failure Risks
- ✓ CKD / AKI Escalation
- ✓ Infectious Disease Red Flags
- ✓ Psychiatric Emergencies
- ✓ Pediatric Emergencies
- ✓ Acute Abdomen
- ✓ GI Bleed

- ✓ Obstetric Emergencies
- ✓ Anaphylaxis
- ✓ Syncope
- ✓ Trauma
- ✓ Fracture Suspicion
- ✓ Urological Emergencies

DIAGNOSIS_TEMPLATE_REPOSITORY for MEDCONNECT.FIT-PH-1-‘V1.0’

MASTER SCHEMA

```
template_id,  
diagnosis_id,  
diagnosis_name,  
primary_specialty,  
secondary_specialty,  
telemedicine_allowed,  
video_required,  
physical_exam_required,  
emergency_referral_required,  
hospital_referral_required,  
escalation_required,  
severity_level,  
recommended_medicine_1,  
recommended_medicine_2,  
recommended_medicine_3,  
recommended_test_group,  
followup_days,  
doctor_advice_template,  
patient_advice_template,  
active_status
```

DIAGNOSIS TEMPLATE

Diagnosis Template Repository, add these 5 columns globally:

requires_lab_confirmation

requires_imaging

abdm_encounter_ready

ehr_summary_template

care_program_tag

These 5 columns will make the repository future-ready for:

- **ABDM integration**
- **AI care plans**
- **CardioConnect**
- **LungConnect**
- **Chronic disease programs**
- **Analytics layer**

without requiring a schema redesign later.
